

Slipp-Nott

Stop sliding around on the floors!
Try *Slipp-Nott*!

Step on... step off... and see the dirt
and dust lift from the shoe soles.

PORTABLE: Use at home games or away games
Base: 18" x 19"
Mat: 15" x 18"

Base and 60 traction sheets
#DSB+DSM60 \$110.00

60 refill traction sheets
#DSM60 \$45.00

Why:

The purpose of *Slipp-Nott* is to provide increased traction for indoor sports resulting in better maneuverability, confidence and safety. Shoes worn by players while playing on indoor surfaces accumulate and build up dirt, dust, and wax on the bottom of their shoes. Any accumulation of foreign material between the shoe and the floor decreases the required traction needed for fast starts, stops, and quick cuts. *Slipp-Nott* greatly improves these conditions by removing this build-up.

How:

Place the *Slipp-Nott* by the scorers table. As your players check in and out of the game, they simply step on and immediately step off of the mat. Dirt and dust are left on the mat. No residue remains on the shoe. When the sheet becomes contaminated, peel the top sheet off and throw it away. The next sheet is ready for use. The average basketball game requires three sheets.

What:

Slipp-Nott traction system consists of two parts; a base and a mat. The **base** is made of ABS (Acrylonitrile Butadiene Styrene) and is bonded to a ribbed rubber backing. The base holds the replaceable mat. The **mat** is a replaceable set of sheets made of clear polyethylene, coated with a water based acrylic material, specially formulated for the *Slipp-Nott*. When the top sheet becomes contaminated, simply peel it off and the next sheet is accessible for use.
